

B BB MERCHANT SERVICES

WELCOME TO THE TEAM

HANNAH HOFSETH

BB Merchant Services would like
to welcome Hannah Hofseth to
the team as a Junior Programmer

We are pleased to welcome Hannah as the newest member of BB Merchant Services.

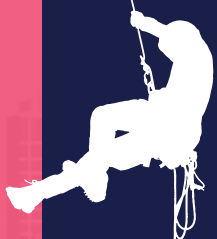

Hannah recently completed her Bachelor's degree in Information Technology and is currently undertaking a Master's degree in Applied Computer Science and Engineering. Her academic background brings valuable knowledge as we continue to strengthen our technology and data capabilities across the business.

Prior to her academic studies, Hannah completed a year of military service in the north of Norway. This experience helped develop her independence and problem-solving skills, qualities that align well with our consultative and analytical approach at BB Merchant Services.

Outside of her studies, Hannah enjoys being active in nature. Since relocating to Bergen, she has developed a strong interest in mountain hiking and distance running, participating in the Bergen City Half Marathon for the last two years.

She is also an active member of a university climbing team, reflecting her drive, teamwork and resilience.

We look forward to the contribution Hannah will make, and are pleased to welcome her to the BBMS team as we continue our work supporting clients across the globe to cut payment processing costs through independent, expert advice and market benchmarking.

Welcome to BB Merchant Services, Hannah.
